Who We Are

Private Spring Water offers a unique and natural way to deliver your message and elevate your brand! Our custom-labeled bottles are an ideal solution to enhance your guest experience, add revenue to your bottom line, help promote an event, or motivate your employees to enrich their bodies and minds in a natural, healthy way with spring water.

Since 1994, Private Spring Water has been the leading national supplier of premium quality, private labeled spring water in the United States. Our vertically-integrated services include state-of-the-art bottling facilities in California and Pennsylvania, an in-house graphic design team, an advanced nine color label printing press, and an efficient network of delivery trucks for local distribution. We have also strategically partnered with reliable freight carriers that offer us outstanding shipping rates that we pass along to our customers for national distribution.

Private Spring Water is the perfect choice for organizations looking to enhance their brand while providing responsible hospitality. We offer a variety of cost-effective programs that are customized to fit our customers' needs—backed by exceptional customer service.

Brands come to life with
Private Spring Water!

About Our Water

Private Spring Water is the leading national supplier of Premium Custom Labeled Spring Water. Optimizing time and resources, we have plants located in California and Pennsylvania, making us the number one choice for premier resorts, hotels, and retailers throughout the country and the Bahamas.

Our plant in Pennsylvania has bottled water at the source since 1927. This water source flows from the Penobscot Ridge Mountains in the Lackawanna State Forest of Pennsylvania, a majestic area with exceptional water quality and taste.

Private Spring Water's California plant sources from both Baxter Springs in Northern California and the ancient springs of the great Palomar Mountain in San Diego County, California.

Baxter Springs, located 4,500 feet up in the pristine Northern California Sierra Nevada Mountains, has been producing spring water for 150 years. This rich natural spring produces thousands of gallons of water daily with consistently outstanding clarity and quality and a refreshing taste.

The protected Palomar Mountain towers high above Northern San Diego County. High in elevation and generous in annual precipitation, this source produces a rich amount of clean, high quality water that's hard to beat. Palomar Spring water is naturally alkaline, pure H₂O.

Interested in enhanced water? We offer that too! Private Spring Water offers a variety of water types for our customers.

Choose from: Sparkling, Purified, Spring, Mineral Enhanced, Vitamin Enhanced, Flavored, Alkaline, and De-Ionized Water

Let's Get Started

Private Spring Water is the best long-term partner for your bottled water needs because of our core capability's for over twenty years:
